

**WELL, WE WARNED YOU
THERE WAS A LOT.**

IS THIS GREAT, OR WHAT?

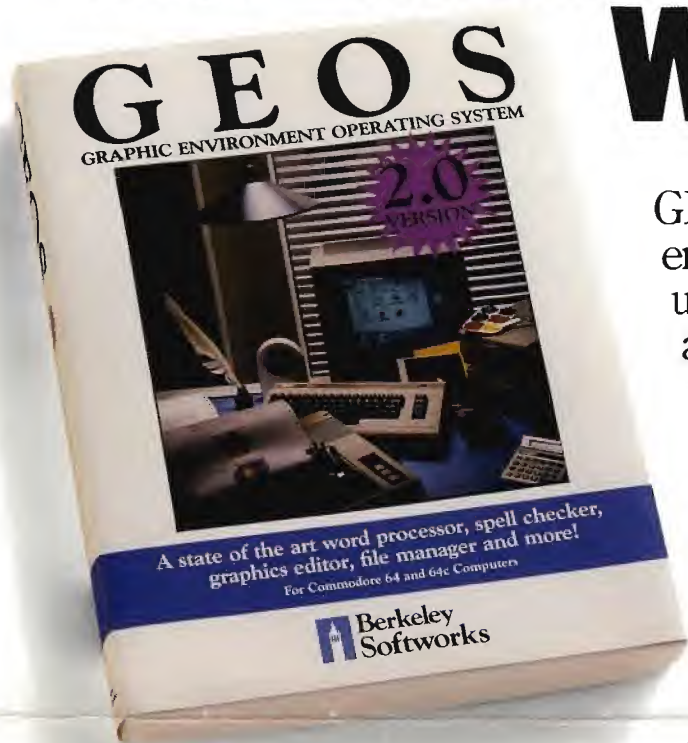

**KEEP GOING,
THERE'S EVEN MORE.**

The brightest minds are working with Berkeley.

**WE COULD GIVE
YOU A LONG LIST OF
REASONS TO UPGRADE
TO GEOS 2.0.**

AS A MATTER OF FACT, WE WILL.

GEOS™ 2.0 isn't just a couple of itty-bitsy enhancements. It's all kinds of brand new upgrades. Whole new products. With applications we used to sell separately rolled right into one package.

In fact, we included so many new features and facets that GEOS 2.0 is almost unrecognizable from its first cousin.

GEOS 2.0 is crammed with new features. And what isn't completely new has been radically improved. So take a look at the list of reasons why we

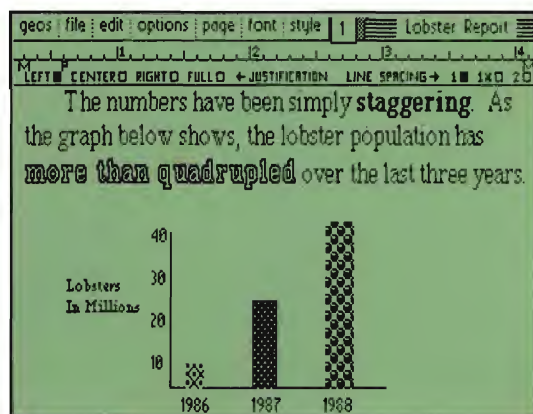

think you should upgrade to GEOS 2.0. Then see if you can come up with one good reason why you shouldn't.

1. geoWrite™ 2.1: Something to write home about.

Word processing takes a giant leap forward with a formidable family of features. All of what used to be called geoWrite Workshop is now included as part of the GEOS 2.0 package. In addition to everything you got in earlier versions of geoWrite, you also get a new feature that converts your words (or any geoWrite file) into a geoPaint™ document. So now you can incorporate all kinds of new graphic capabilities into your compositions, like multiple column overlays, headlines and borders and even the ability to add colors. Text Grabber™ converts any Commodore-based text (like PaperClip™, Easy Script™, Speed Script™ and Word Writer™) into geoWrite format.

NEW: 10 fonts in 7 styles and multiple sizes

- Date and time stamping • Individual paragraph formatting • Margins expandable to 8 inches • Right, left, center and full justification • Single, 1.5 and double spacing options • Page numbering • Headers and footers • Decimal tabs • Search and replace • Paragraph indents • Page preview.

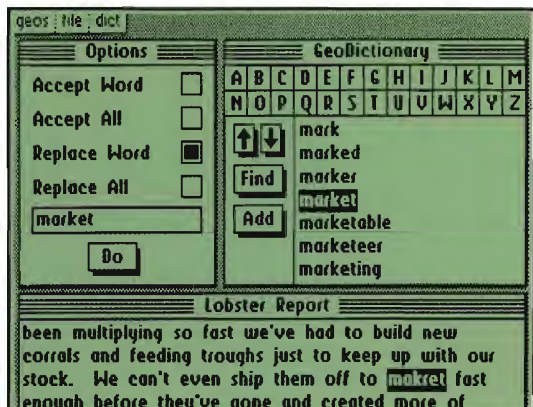

geoWrite

2. Watch your P's and Q's with geoSpell™.

Even the most beautiful documents come off looking bad if they're filled with misspelled words. So geoSpell automatically scans its own geoDictionary™ and corrects any blunders it finds. You can also create and update a dictionary of your own personal terms. View both the dictionary and your document while spell checking.

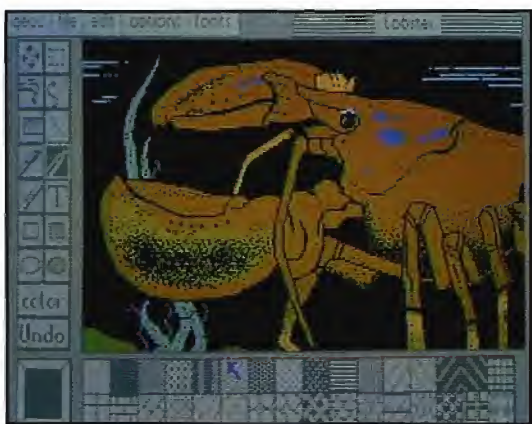

NEW: 38% faster.

geoSpell

3. geoMerge™, geoLaser™ and much quicker mice.

GEOS 2.0 includes geoMerge, for combining your lists with geoWrite documents to create customized form letters and labels. And geoLaser lets you print out near-typeset quality on an Apple® LaserWriter™. And a new driver accelerates your mouse for much more accurate cursor movement.

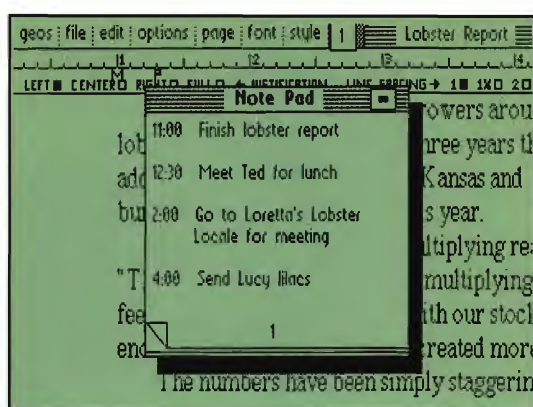

geoPaint

4. geoPaint has grown—and shrunk!

Sure, you still get 16 colors, 14 graphic tools, 32 brush shapes and 32 painting patterns. But now the incredible graphics application can also enlarge or reduce your images to scale! Along with other new functions that increase control and creativity.

NEW: Stretch and scale graphic images • Transparent paint brushes

- to create "bleed-through" effects • Drawing grid for easier sketching of large images • Stop pattern fills in progress • Brush options window to select drawing and pattern modes • New graphic shapes including connected lines, ellipses and squares.

Desk Accessories

5. Desk Accessories do even more.

The calculator and notepad still pop up anywhere you need them. The alarm clock still chimes, too. But that's about all that's the same. NEW: Cut and paste from the calculator and notepad into other GEOS™ applications • Name each graphic/text scrap in a photo album for easy identification • Search for graphic/text scraps by list or name • Quicker photo album access.

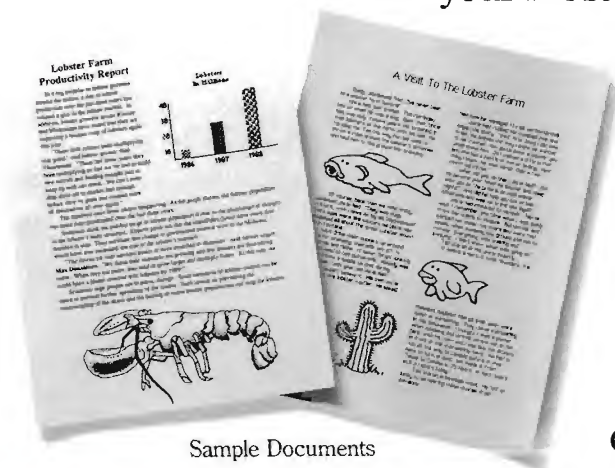

6. We're throwing in a new desk!

The 2.0 deskTop™ is faster and far more efficient than before, not to mention more colorful. You can manage more files, more disks and more drives (even the 1581) in less time. The new deskTop can even retrieve your most recently deleted file from the waste basket!

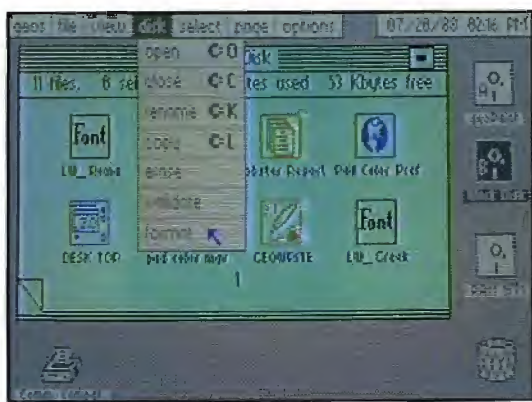

NEW: Supports 2 disk drives and a RAM

Expansion Unit (1541, 1571 or 1581 drives and 1750 or 1764 RAM expansion units)

- Automatic date and time display • Faster file copies with fewer disk swaps • Erase entire disk without reformatting • Color code the notepad and file icons for easier identification and organization • Multiple file selection for most operations • Insert and delete notepad pages • Simplified printer and input driver selection.

deskTop

7. An incredibly low price of only \$25!

Of course, we saved the best reason for last.

Purchased separately, all these new products would cost over \$139. Upgrading them all would be pretty costly, too. In fact, GEOS 2.0

alone costs \$59.95. But until September 30, 1988, you can get it for less. A whole lot less. Just fill out the form below and return it with your GEOS disk. We'll send you GEOS 2.0 for only \$25.
